HANDMADE IN THE U.S.A

The Talking Walls of Queen Cutlery

"If the walls of Queen Cutlery could only talk!" That is the first thought for most of us when walking through the doors of America's oldest knife manufacturer. Knives have been made continuously here since 1902. Preserved within this old building on 507 Chestnut Street is an unequalled commitment to the American cutlery tradition, from a time when craftsmanship and quality towered overall.

Every knife made in the Queen factory today is continuing that tradition to quality that began in 1902. Each person who has a hand in making a knife within these hallowed walls is fully aware that their work—and craftsmanship—is being overseen by the ghosts and legacy of cutlers who made knives at this same location over a century ago.

In that unique way these walls do indeed talk, still reflecting the whump of machinery, the tap of the cutler's adjusting hammer, and the walk and talk of a finely crafted knife.

The old English cutlers called the feel of a blade tang against the backspring the "walk", and the crisp snap of the blade closing when properly fitted the "talk". A knife with "walk and talk" is a familiar term at Queen today, an art that is becoming rarer and rarer with the move by many manufacturers to produce springless locking liner knives.

The cutler's sounds can still be heard today within these walls. Queen Cutlery has improved and modernized the materials--better steels, stronger handle materials, more durable knives—but they have kept the tradition of craftsmanship and quality that remains unchanged as it was since those first knives were made here in so long ago.

This legacy predates even Queen Cutlery. The factory's first tenant of 507 Chestnut Street was the Schatt & Morgan Cutlery

Schatt and Morgan

Limited Production

File and Wire Series

John W. Schatt and Charles B. Morgan established the Schatt & Morgan Cutlery Company in 1895 as an importing and contract label knife company known as the "New York Cutlery Company" (not to be confused with the well-known New York Knife Company of the same era.)

The two men opened an office in New York City 1896 and soon moved to Schatt's hometown of Gowanda, New York. In July of 1897 Schatt & Morgan purchased the Platts' cutlery plant in Gowana.

The Platts family bears their own story of their contribution to American cutlery. They were originally Sheffield cutlers who emigrated to the US to work as cutlers in the burgeoning cutlery factories of the Connecticut Valley.

When J.B.F. Champlin started Cattarugus Cutlery he hired Charles Platts to come to Little Valley, NY, and his sons would eventually start the Platts' factory that would later sell to Schatt & Morgan. Schatt & Morgan made knives in Gowanda until 1902 when they moved to the Titusville, Pennsylvania, to a factory on Chestnut Street, where they incorporated.

In 1991 Queen Cutlery would revive the trademark of their forbearers. with recreations of those classic vintage patterns, and that revival continues today.

Kious has long been regarded as one of the top knife-makers in the world, whose work has been featured in numerous art knife books and knife periodicals. One of his knives is featured in a scene in the 1991 movie, "Exposure," in which a knife seller displaying his selection of combat knives to the star of the film picks up a smart dagger and says, "Joe Kious, very expensive." So we're honored to be able to introduce the first design of a spectacular knife line.

Constructed for the working man that is looking for a great work knife, these knives were constructed with the working man in mind. Queen designed the knives using Delrin Handles. This material is noted for long lasting, "man-handeling" use! Exposed Bolster Pins are added for extra leverage. 1095 Carbon steel and matt finished blades for fast and easy sharpening.

Queen Cutlery Co. Warranty

Queen Cutlery Company knives are designed and built for use as cutting tools. Use of our knives for any purpose other than cutting is considered abuse. As with any tool Queen Cutlery Company knives can wear out. They may also fail to perform if not used or cared for properly. If your knife has been put to hard use for a long period of time, it is possible that the useful life of the Queen Cutlery Company product has been exceeded and Queen Cutlery Company will be unable to perform any work upon the knife that will improve the condition thereof.

WARRANTY INFORMATION:

- >Queen Cutlery Company warrants that all of our products are free from defects in material and workmanship.
- >Repairs to your knife performed by any source other than Queen Cutlery Company unconditionally voids the knife's warranty.
- >Queen Cutlery Company's warranty does not cover damage caused by abuse, misuse, loss, improper handling, alterations, accident, neglect, disassembly, or improper sharpening.
- >If a knife fails to function as it was designed, we will examine its condition upon its return to Queen Cutlery Company identify why it failed and respond in an appropriate manner.
- >If we determine there is a defect in the manufacture/materials/workmanship, Queen Cutlery Company will repair, or replace that product with the same model or one of equal value at its own expense.

If Queen Cutlery Company is unable to improve the condition of the knife, we will return it to you with the recommendation it be retired from use. All costs associated with shipment of the product(s) are the responsibility of the customer.

WHERE TO SEND YOUR KNIFE:

When sending your knife for warranty or repair- include a description of the problem and how it occurred. Please send your knife in a box. Knives have a tendency to tear envelopes in transit. Include: Company or individual name, return address daytime phone number. We recommend shipping UPS or registered mail for your tracking purposes.

Queen Kiddo Project

The Queen Kiddo Project, Ken Daniels, CEO, will give kids 13 years and under a free knife with this label on it. He decided to do this project to help pass on his love for knife collecting. Every year if they bring this knife back to a show he will add another free knife to their collection. Its all about starting them a collection, sparking their interest and seeing the smiles on their faces.
